

**CHICOPEE®**

# Microfibre Floor Mop Plus & Super

Chicopee® True Confidence™

Single use Microfibre mops designed to be pre-saturated in a bucket or trolley system, in the same way as traditional flat microfiber mops. Designed for areas where laundry is not practical or hygiene and cross contamination reduction is of the up-most importance.

# Microfibre Floor Mop Plus & Super

Designed for pre-impregnating before usage

## MICROFIBRE 4F

Our unique range of short term use floor mops utilise our patented Microfibre 4F fabric to help capture dirt and bacteria in the mop, while helping to reduce the risk of cross contamination by discarding after use rather than laundering.

The Chicopee floor mops are specially designed to be compatible with most market leading tools that support a hook and loop attachment system.

The mops are ideal to be used pre-impregnated but can also be used in combination with liquid or fluid on board systems to increase the area that can be cleaned.

Hook and Loop Attachment System

Solvent Resistant

Absorbent

### Benefits of disposable Floor Mops

- Thanks to their unique disposable nature, Chicopee Floor Mops are ideal for critical cleaning jobs. The special Hook and Loop backing ensures that the mop remains attached to the mop head even when fully saturated, preventing bending down and speeding up cleaning time
- Remove the risk of cross contamination after washing by switching to a clean disposable system
- The Chicopee Floor Mop Plus and Super are designed to match the performance of woven Microfibre flat mops, cleaning up to 15m<sup>2</sup> and 19m<sup>2</sup> respectively
- Compatible with market leading hardware and does not deplete market leading chemicals like Quat, chlorine and hydrogen peroxide. Key for effective disinfecting and reducing chemical usage
