Using patented SpinLace® technology, S.U.D.S. Multipurpose Light wipes maintain your sanitizer or disinfectant potency. Unlike cotton towels that deplete up to 40%, S.U.D.S. Multipurpose Light wipes are compatible with quat based sanitizers and disinfectants, and have labels available for colour-coding the lids to further simplify the cleaning process and make employee training even easier. Ensuring managers and operators can be confident the cleaning protocols will be maintained with this easy to implement system.
